Contents

Foreword vii

Organizing Committees viii

Participants ix

Conference Photograph xiii

Invited Talks

Prominence formation and oscillations 1
P. F. Chen

STEREO and SOHO contributions to coronal mass ejection studies: Some recent results 11
N. Gopalswamy

The solar corona: What are the remaining fundamental physical questions? 25
Petrus C. Martens

Coronal mass ejections and space weather 37
David F. Webb

Contributed Talks

Models of force-free spheres and applications to solar active regions 51
A. Prasad and A. Mangalam

MHD seismology as a tool to diagnose the coronae of X-ray active sun-like flaring stars 59
A. K. Srivastava and Sairam Lalitha

Solar eruptive filament studies at USO for the COMESEP project 67
N. Srivastava, N. Crosby, A. Veronig, E. Robrrecht, B. Vršnak, S. Vennerstrom, O. Malandraki, S. Dalla, L. Rodriguez, M.Hesse and D. Odstrcil

Heating of active region cores: Impulsive or steady? 73
Durgesh Tripathi

Posters

Use of a time delay dynamo model to obtain solar-like sunspot cycles 83
E. Amouzou, D. Nandy, A. Muñoz-Jaramillo, and P. Martens

Coronal mass ejections associated with short and long duration X-ray flares 87
M. Anna Lakshmi and S. Umapathy

Dependence of solar wind velocity and interplanetary magnetic field on Pc4 magnetic pulsations at low latitudes in India 91
I. A. Ansari, K. A. Nafees, A. K. Sinha and B. M. Pathan

How are Forbush decreases related with IP magnetic field enhancements? . 95
K. P. Arunbabu, P. Subramanian, Sunil Gupta and H. M. Antia

Fluctuations in the interplanetary electric potential and energy coupling between the solar wind and the magnetosphere 101
Badruddin and O. P. M. Aslam

Interplanetary coronal mass ejections, their associated features, related plasma/field variations and transient modulation of cosmic rays 105
Badruddin and Anand Kumar

On the statistical aspects of sunspot number time series and its association with the summer-monsoon rainfall over India 109
Surajit Chattopadhyay and Goutami Chattopadhyay

Double ring algorithm of solar active region eruptions within the framework of kinematic dynamo model 115
Soumitra Hazra and Dibyendu Nandy

Constraining the amplitude of turbulence in solar corona using observations of angular broadening of radio sources 121
Madhusudan Ingale, Prasad Subramanian and Iver H. Cairns

Estimating arrival time of 10 October 2010 CME using STEREO/SECCHI and in-situ observations 127
Wageesh Mishra and Nandita Srivastava

Imaging the Sun with the Murchison Widefield Array 131
D. Oberoi, L. D. Matthews, I. H. Cairns, S. J. Tingay, L. Benkevitch, A. Donea, S. M. White, W. Arcus, D. Barnes, G. Bernardi, J. D. Bowman, F. Briggs, S. Burns, J. D. Bunton, R. J. Cappallo, B. E. Corey, A. Deshpande, L. deSouza, D. Emrich, R. Goeke, B. M. Gaensler, L. J. Greenhill, B. J. Hazelton, D. Herne, M. Johnston-Hollitt, D. L. Kaplan, J. C. Kasper, B. B. Kincaid, R. Koeing, E. Kratzenberg, C. J. Lonsdale, M. J. Lynch, S. R. McWhirter, D. A. Mitchell, M. F. Morales, E. Morgan, S. M. Ord, J. Pathikulungara, T. Prabu, R. A. Remillard, A. E. E. Rogers, A. Roshi, J. E. Salah, R. J. Sault, N. Udaya-Shankar, K. S. Srivani, J. Stevens, R. Subrahmanyan, M. Waterson, R. B. Wayth, R. L. Webster, A. R. Whitney, A. Williams, C. L. Williams and J. S. B. Wyithe

Analysis of the solar coronal green line profiles from eclipse observations 137
Maya Prabhakar, K. P. Raju and T. Chandrasekhar

Indicators of solar filament remnants in ICMEs 143
Rahul Sharma and Nandita Srivastava

Author Index 147
